HEALTH OF LOCAL RESIDENTS COMPARED

Cont'd from page 1

In general, it appears, the state of health of a family is linked with its economic and social well-being.

According to an analysis of the statistics, made by the American Medical Association in its publication "Update," the healthiest people in the nation are those living on farms in the midwest, with incomes of more than $10,000.

This matter of health, together with the means to improve it, is looming up as one of the major subjects to be taken up by the new Congress. It is in line with the Administration's move to develop programs that will provide quality care for all citizens, rich or poor.

SOUTHSIDE ELECTRIC PLANS EXPANSION

by S.E.C. for major improvements in 1973.

The changes will include new and larger conductor and new poles and hardware where required. The changes will inconvenience the member during construction, however, upon completion the members in the area will receive better and more adequate service. The increased use of electricity by existing members and anticipated new members coming into the area are the primary reasons for the improvements.

The Southside Electric Cooperative facilities located in Appomattox County are valued at approximately $480,039.00 and in 1972 S.E.C. paid $3,198.68 in property taxes to the County.

Feed Grain, Wheat Program Sign-Up

Sign-up forms, helpful assistance are all on tap at the Appomattox County Agricultural Stabilization and Conservation Service (ASCS) office ready for the farm program sign-up period which began Monday, Feb. 5, and will continue through March 16.

So reports ASCS county Chairman James R. Ford. Jr., who anticipates that approximately 600 farmers in Appomattox County will sign-up for participation in the 1973 feed grain and wheat programs.

He pointed out that there has been some revising of program provisions since initial announcements were made, and he suggested that farmers should keep a close eye on mail and news announcements from the ASCS county office to be sure they are up-to-date on all program details.

Once a producer is sure of his program choices, then it's a wise idea for him to come in and sign up at the ASCS office as soon as possible, Mr. Ford said. "It will save the farmer's time if he comes in early -- before there is a line-up. Even a short line can mean a considerable wait, since it sometimes takes half an hour or more to complete one sign-up.

Farmers also were reminded that measurement services -- which are provided at cost -- may be requested at any time from the ASCS county office. "A farmer doesn't have to wait till he signs up to put in for measurement service," the Chairman said.

During the six-week sign-up period, Feb. 5 - March 16, the ASCS county office will maintain its regular hours Monday through Friday, from 8:30 a.m. to 5:00 p.m.

Gamma Iota Sorority Chapter Met

Sunday, Feb. 18, at 5 o'clock, thirty members of Gamma Iota Omega Chapter of Alpha Kappa Alpha Sorority assembled at Camp Winonah for their observance of Founders Day. This sorority, founded at Howard University 1908, was the first Greek letter organization established by Negro women and committed to the maintenance of high scholastic and ethical standards as well as to service to all mankind. Presently there are more than 40,000 members in the three hundred and fifty chapters located in thirty-seven states, the District of Columbia, Nassau in the Babanas and Liberia, West Africa.

Since 1965 Alpha Kappa Alpha has held a contract with the Federal Government for the operation of a Job Corps Center in Cleveland, Ohio. It is a women's residential training center for all races. Furthermore, scholarships, Domestic Travel grants to high school students, and Foreign Travel Grants to undergraduate members are provided yearly.

These are a few of the reasons for honoring our Founders.

One feature of the meeting on Sunday was a progress report from the Sickle Cell Anemia Committee working actively with the Lynchburg City Committee. This year is dedicated to the education of the public as to the importance of early recognition of the disease and dissemination of pertinent materials.

Another phase of the program was a report from the Negro Heritage Committee. In compliance with the National Creed, they seek to inform members, as well as the general public, of the contributions Negroes have made to National prestige. After all an informed American is a better American.

To list a few:

Dr. Charles Drew introduced the idea of a blood bank and was appointed Director of the first American Red Cross Blood Bank.

Dr. Daniel Williams, 1893, performed the world's first successful heart operation.

Benjamin Bannaker, grandson of a slave completed the architectural design of the District of Columbia when Major L. Eufant, the original architect packed up and quit.
